### Frontend Developer

Sep 2024 – Present

- Developed a Multi Vendor ecommerce website and dashboard with blog features that helped clients to get leads.
- Maintained and revamped AAEC global consultancy website adding new features: CV Builder, 6 different kinds of certificate builder used by 100+ users, dashboard for articles, teammember, branch management.
- Designed and built a company website which has a website part and separate dashboard for employees and administrators. Used by 10+ employees and administrators.
- Translated stunning Figma UI/UX design for UGS website which contains dashboard and three distinct pages having dynamic state management for question answer form and dynamic routing for different visa pages. used by 100+ users. Also built creative builders website collaborating with peers.
- Mentored new teammates about project architecture and led successful completion of project. Communicated with the backend team for api requirements for robust backend apis.
- Helped to create SEO friendly, responsive and fast react and Nextjs sites by employing responsive layouts, meta data and static site generation.
- Designed and architected robust authentication mechanism for dashboard login, signup features.

Infoclick Digital Solutions

*Biratnagar, Nepal*

### Frontend Developer

Dec 2023 - Jul 2024

- Contributed to develop and enhance image generation ai frontend
- Built responsive and stunning ui for projects
- Worked and integrated backend rest api's to react frontend using redux and built frontend ui parts like forms, menus
- Developed and collaborated with fellow developer to create jewellery blog website using markdown content

## PROJECTS

### Travel Log App

- In this project i attempted to create a travelling discussion forum where users can share and discuss their ideas
- Used MERN Stack (Mongodb, Express, React, Node.js). Used MVC architecture for backend and modular architecture for frontend.

- I learnt about state management, restful apis, ui components and much more about frontend and backend technologies and tooling which helped me to enhance my fullstack web development skills.

### **Next Ecommerce**

- In this project I created a fullstack Next Js ecommerce website where users can search and select the products they want to order.
- Used Next.js, Tailwind CSS for tech stack. Built both frontend and backend in Nextjs itself and added a secure middleware based authentication.
- I learnt about how to create full stack web apps in nextjs using it's cool features like static site generation, server side rendering.
